DETAILED ACTION

Claim Objections

Claim 5 is objected to because of the following informalities: Dependent claim 5 as submitted recites "The formed composition according to claim 1..." whereas Claim 1 defines a foamed composition. In view of the apparent typographical error, appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over reference JP 02238098A to Soi et al/Kao Corp. (English language abstract), and further in view of JP-A-5-156293 to Takanashi et al/Kao Corp. (English language abstracts, machine translation (English), specification reference at p. 2) and JP 09-104898 to Miyamae et al/Lion Corp.

The Soi et al '098 reference discloses use of a hydrogen peroxide-based bleaching agent containing 0.1-5% of an alkyl glycoside nonionic surfactant , construed as having the structure as instantly claimed referred to in terms of a reducing sugar, for use in improving the bleaching action or foam-cleaning power of mildew removers or bleaching of clothing, inter alia. This reference's abstract is silent as to another surfactant.

However at the time of the invention, one skilled in this art could turn to the Takanashi et al '293 reference, which relates to a similar peroxide composition, for treatment of mildew, also containing 0.1-5 weight % of the subject alkyl glycoside nonionic surfactant, as well as another surfactant such as a polyoxyethylene alkyl ether (C8-C22) wherein the polyoxyethylene moiety is 5-100 moles alkyl ether, and the Miyamae et al '898 reference which teaches an A/B ratio of similar surfactants in a hydrogen peroxide bleaching composition, for the teaching of combining a

polyoxyethylene alkyl ether with an alkyl glucoside in the ratio called for by the present claims with a high expectation of success in bleaching a substrate including clothing.

No claim stands allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
